Search Notes

Dear Examiner Najarian,

Please find attached the results of your search for the above-referenced case. The search was conducted in the template files.

I have listed *potential* references of interest in the first part of the search results. However, please be sure to scan through the entire report. There may be additional references that you might find useful.

If you have any questions about the search, or need a refocus, please do not hesitate to contact me.

Thank you for using the EIC, and we look forward to your next search!

Paul

A REAL OPTIONS MODEL FOR THE EVALUATION OF TELEMEDICINE (WEST VIRGINIA)
Author: CAMERON, ANDREW ELLIOT
Degree: PH.D.
Year: 1998
Corporate Source/Institution: THE UNIVERSITY OF MICHIGAN (0127)
Source: VOLUME 59/10-B OF DISSERTATION ABSTRACTS INTERNATIONAL.
PAGE 5300. 165 PAGES

...Doctor TeleVision (MDTV) telemedicine system to assess financial viability. The relative savings or losses to **third-party payers** from providing health care by means of telemedicine are estimated.

From a societal perspective, the output of the simulation model gives a standard **net present value (NPV)** of about \$2.8 million from about 54,000 teleconsultations over seven years. This suggests...

...standards, the investment in telemedicine is justified. The real options analysis goes beyond a standard **NPV** analysis to demonstrate that the actual potential for the telemedicine project can be far greater...

...for its salvage value.

If all four types of real options are present, the expanded **NPV** rises to over \$4.6 million. Thus, the presence of the four real options adds...

A REAL OPTIONS MODEL FOR THE EVALUATION OF TELEMEDICINE (WEST VIRGINIA)
Author: CAMERON, ANDREW ELLIOT

Degree: PH.D.
Year: 1998
Corporate Source/Institution: THE UNIVERSITY OF MICHIGAN (0127)
Source: VOLUME 59/10-B OF DISSERTATION ABSTRACTS INTERNATIONAL.
PAGE 5300. 165 PAGES

...Doctor TeleVision (MDTV) telemedicine system to assess financial viability. The relative savings or losses to **third-party payers** from providing health care by means of telemedicine are estimated.

From a societal perspective, the output of the simulation model gives a standard **net present value (NPV)** of about \$2.8 million from about 54,000 teleconsultations over seven years. This suggests...

...standards, the investment in telemedicine is justified. The real options analysis goes beyond a standard **NPV** analysis to demonstrate that the actual potential for the telemedicine project can be far greater...

...for its salvage value.

If all four types of real options are present, the expanded **NPV** rises to over \$4.6 million. Thus, the presence of the four real options adds...

...Doctor TeleVision (MDTV) telemedicine system to assess financial
viability. The relative savings or losses to **third-**
party payers from providing health
care by means of telemedicine are estimated.

From a societal perspective, the output of the simulation model gives
a standard **net present**
value (NPV) of about \$2.8 million
from about 54,000 teleconsultations over seven years. This suggests...

27 consecutive **patients scheduled** for total hip replacement were randomly divided into three groups. The first group had their operations under epidural analgesia, the second whilst breathing halothane spontaneously and **patients** in the **third group** were anaesthetized using a modified neuroleptanaesthetic (NLA) technique. Blood lost during the operation was measured...
